Office Sharing Register

Ver 19, 14/10/2026

This register has been established and maintained in accordance with clause 4.2.4 of the AER's Ring-fencing Guideline for Electricity Distribution (Version 3, November 2021).

The Guideline requires that the office register must identify where Energex (DNSP) uses the same office (i.e. a building, an entire floor of a building or a part of a building that has separate and secure access requirements such that staff from elsewhere in the building do not have unescorted access to it) as a related electricity service provider (RESP) e.g. Yurika and/or Ergon Energy Retail providing contestable electricity services and one of the following conditions apply.

4.2.1(b)i. Staff have no access to electricity information; have access to electricity information but no opportunity to use that information to engage in conduct that is contrary to the ring-fencing guideline; or only have access to electricity information to the extent necessary to perform services that are not electricity services (such as general administration, accounting, payroll, human resources, legal or regulatory, or information technology support services)

4.2.1(b)iii. Regional office i.e. an office that has less than 25,000 connection points within a 100 kilometre radius of that office (except where this exemption has been varied or revoked as per an AER Waiver)

Office Location	DNSP Staff	RESP Staff	Ring-fencing Controls	Exemption / Waiver
Eagle Farm Distribution Centre	• Corporate Shared Services • Health, Safety & Environment • Operations Delivery Enablement • Procurement and Supply • Works Program Optimisation	• Materials Sales	• System user agreement • Ring-fencing training • Digital access controls • Employee ID and building access cards • Seating allocation	4.2.1(b)i
