Approval Conditions

I hereby acknowledge fully the conditions under which this Approval is being issued. Those conditions being -

- The RTO ensures full compliance to the Electrical Safety Act 2002 as amended.
- The RTO satisfies the requirements for the roles of an RTO, Escort Service Provider, or Scoping Service Provider as appropriate, which are contained in the Code of Practice 2010, Working Near Overhead and Underground Electric Lines– Section 8 - Transportation of High Loads Near Electric Lines.
- The RTO shall scope or assess each route to ensure no persons, operating plant, or vehicles including part of the load will come within the exclusion zones as defined in Schedule 2 of the Electrical Safety Regulation 2013,
- The Scoping Record along with the applicable Notification Form 1043, will be kept for a period of 12months and made available for audit purposes, if required by Energex or the Electrical Safety Office.
- The RTO must notify Energex of each Category 2 high load being transported prior to departure,
- If Energex is required to scope or assess the route for a load associated with this approval, a minimum of 10 working days notice to Energex is required.
- The RTO must notify the network owner of operational electrical safety problems that have been identified e.g. damage to network assets.
- The RTO acknowledges it will be fully responsible for all costs incurred with any Energex emergency response associated with moving high loads under this approval.
- All work, transport related or otherwise, is performed outside applicable exclusion zones.
- This approval is valid for 12 months from the date of issue.
- This Approval will be made available at the time of the High Load movement to any Authorised Officer requesting it to be presented.
- This approval may be revoked at any time by the Energex Business Improvement and Compliance Manager.
